The workhorse of the Gemini range the Tinytag Plus 2 data loggers are housed in robust, waterproof (IP68) rated cases that are designed for use in harsh and outdoor applications.

Tinytag Plus 2 data loggers have a high reading accuracy and resolution, large memories, a fast offload speed and a low battery monitor.

The TGP-4017 is a self contained temperature recorder.

Notes

- Battery Type: SAFT LS14250 or LST14250; Tekcell SBAA02P
- The logger will operate with other ½AA 3.6V Lithium (Li-SOCl2) batteries but performance cannot be guaranteed.
- Replacement Interval: Annually
- Before replacing the battery, the data logger must be stopped.
- When replacing the battery, wait at least one minute after removing the old battery before fitting the new one.
- Data stored on the logger will be retained after a battery is replaced.
- If used at low temperatures the data logger should be allowed to warm to room temperature before it is opened to avoid condensation forming inside the unit.
- The IP68 rating is valid only when the unit’s connector cap is fitted and is valid to a depth of 15m (50ft).

Calibration

This unit is configured to meet Gemini’s quoted specification during its manufacture.

We recommend that the calibration of this unit should be checked annually against a calibrated reference meter.

A certificate of calibration, traceable to a national standard, can be supplied for an additional charge either at the point of purchase, or if the unit is returned for a service calibration.
